

# Lead and Copper Participant Survey

Thank you for participating with lead and copper monitoring for the Environmental Protection Agency. To maintain complete records and estimate your home's risk factors, we ask that you complete this survey.

Customer Name: \_\_\_\_\_

Phone Number: (\_\_\_\_) \_\_\_\_\_

Email Address: \_\_\_\_\_

Physical Address: \_\_\_\_\_  
Street Number and Street Name

Mailing Address: \_\_\_\_\_  
Street City, State Zip

Install year of plumbing at main consumption source: \_\_\_\_\_  
Typically the kitchen sink; if unknown, write: UNKNOWN

Is a permanent water filter installed in your home?  Yes  No

Is a water softener installed in your home?  Yes  No

What type of plumbing materials are used within the home? Plumbing material can be verified by viewing the lines connecting to your water heater and faucets. Check all that apply:

- Lead (dull, dark gray, similar to pencil lead. Easily scratched with hard object, shiny when scratched)
- Copper (copper color, green tarnish)
- Galvanized Iron/Steel (Black, some reddish-brown rust, hard to scratch)
- PVC (Polyvinyl Chloride pipe, typically white in color)
- Pex (Cross-Linked Polyethylene pipe, typically red, blue, or black in color)

Thank you for your assistance,

Mike Jones  
General Manager, Milcrofton Utility District
